Profile

Product-oriented AI Engineer focused on agentic systems, RAG, and production deployment. I build end-to-end solutions: from architectural design and integration with clinical/business stakeholders to rollout with observability and metrics, continuously iterating to maximize impact on end users.

Experience

- **Doctor911** Mar. 2025 – Present
Chief Technology Officer (CTO) Jan. 2026 – Present
 - Leading technical strategy, roadmap, and execution, prioritizing architectural design and team coordination.
 - Defining engineering standards (quality, security, observability) and optimizing the delivery process (CI/CD).
 - Designing and developing AI/Data Science products (Agents, RAG), ensuring reliability and scalability.
 - Integrating end-to-end clinical and business workflows (WhatsApp/web), ensuring traceability and clear metrics.
 - Focus on impact: reduced purchase friction and improved recommendation experience for end users.
- *AI Engineer* Mar. 2025 – Jan. 2026
 - Built multi-agent chatbots (LangGraph) with RAG and context management integrated into WhatsApp Business and web.
 - Implemented native payments and catalogs in WhatsApp for automated exam recommendations and purchasing.
 - Developed data pipelines and production services, evaluating and applying iterative improvements with real feedback.
 - Deployed cloud infrastructure (Cloud Run, Vertex AI) with advanced monitoring to ensure high availability.
- **WiseConn Latam** Dec. 2024 – Mar. 2025
Data Science Intern
 - Performed time series forecasting with deep models (Transformers/CNN/LSTM): cleaning and training.
 - Implemented reproducible pipelines and experimentation to compare approaches (metrics, validation, tracking).
 - Integrated models into AWS (SageMaker, S3), enabling efficient consumption and pipeline traceability.
- **Unitti** Sep. 2023 – Jul. 2024
Intern (Software Engineer → AI)
 - Developed Python APIs on PostgreSQL with automated testing, improving backend stability and response times.
 - Created a "Natural Language → SQL" App (Flask, LLMs, Azure/GCP) for business queries in natural language.
 - Iterated the product with real users to improve query accuracy and response clarity.

Education

- **Universidad Adolfo Ibáñez** — *Master of Science in Data Science* 2024 – Present
- **Universidad Adolfo Ibáñez** — *Computer Engineering* 2020 – Jul. 2025
- **Universidad Adolfo Ibáñez** — *Industrial Engineering* 2020 – Jul. 2025

Additional Information

- **Skills:** Python, Pandas, SQL/NoSQL, TensorFlow; LLMs: LangChain/LangGraph, RAG; Cloud: GCP (Vertex AI, Cloud Run), AWS; Web: TypeScript, React; DevOps: Linux, CI/CD, Monitoring.
- **Languages:** English (Advanced), German (Basic).
